certificate, tributary W
certificate, pure proxy P
naive OLS
OLS adjusting for W
OLS subtracting W
OLS adjusting for P
proximal (P1, P2): linear bridge
proximal (P, W): linear bridge
certificate W, minus W
certificate P, minus W (q_W = 0.5)
certificate W, single max
certificate P, single max
A1: tail only, no safeguard
A2: permuted safeguard W
A3: safeguard from another basin
